

Project 9: Proportional and Graduated Symbol Maps

Points: 50 Points

Task 1: Create a proportional symbol map using data that can be appropriately symbolized using this method. Deliver the layout in PDF format. You must find your own data for this map. With your submission, include a short description of the data and their source(s). Make sure to cite data source(s) on the map.

Rubric:

- ❖ The layout and map are overall very neat and well organized. Space is used well, and the data are well presented. (5 Points)
- ❖ Appropriate data were used. (5 Points)
- ❖ The data source(s) should be cited on the map layout. (2.5 Points)
- ❖ Make sure to include a well-designed legend. (5 Points)
- ❖ Include a title and your name. (2.5 Points)
- ❖ Make sure to use appropriate symbol sizes, colors, and background color. (5 Points)

Task 2: Create a graduated symbol map using data that can be appropriately symbolized using this method. Deliver the result in PDF format. You must find your own data for this map. With your submission, include a short description of the data and their source(s). Make sure to cite data source(s) on the map.
